I feel faintly ridiculous giving this a 3, seeing as it's so preposterously overblown and cliched, but it was such entertaining nonsense that it seems mean not to.

I've never read any Mills & Boon/romance novels before, and am highly amused at what it seems nans around the world have been reading - "great scimitars of love" indeed!

A romantic ending to a love story always places a smile on my face and this definitely had one. I savored Tariq's declaration of love, and I'm sure Gwynneth, the heroine, appreciated it as well especially after having to put up with Tariq's misconceptions about her.

As far as the plot goes, it's decent but bland and makes the book a bit forgettable. The sexual chemistry between the two was strong though. There was some decent angst too. Both protagonists shared similar childhoods which influenced their views on relationships. I liked how they were able to open up about their pasts, which seemed to bring them closer.

While not the author's most exciting or memorable book, even within the series, this is still a solid addition to her body of work.

I just kind of found this novel terribly boring. The relationship between hero and heroine developed so quickly and was based on lust and sexual attraction. Then all of a sudden he's confessing his love? I'm sorry but it was way too convenient and fake for me to enjoy completely. Only okay in my books.

Good read for a Mills-and-Boons book.

Teeters between 2.5 and 3 stars.

Don't you hate it when your Dad pays his gambling debts with your pretty faced virginity? Not when he lost to Arabian sheik eye candy!

Trashy, steamy, ridiculous, over-priced and totally formulaic - eh, my 20-something self had a fun hour with it.

Between 2.5 - 3 Stars.

Meh. It was okay, not one PJ's best. Not enough romance, it sort of fell flat. Everything was rushed, but that's what you get when it's only 188 pages long.

I thoroughly enjoyed the book. It is worth the read.

Right now I am fully aware of the criticism I will get in giving this book a four out of five, however, I have to as it is f-ing fantastic. How? you say. I will state here that I am not a Mills & Boon reader and picked up this book amongst a pile of freebies as something to read for a laugh. By all literary points it is entirely fastastical, with more names for appendages than I have ever known, my favourite being her 'pearl within her oyster'(!) The novel itself is full of blatant stereotypes given, including the sexist roles of the male and female lead.

Despite this, the utter baddness of this book had me weeping in laughter from beginning to end. Having not cried hooting in ages I had to give this book a four - I would have given it a five had not the literary Gods threatened to smite me where I stood.

All in all, read for a good romantic laugh and a tingling feeling down below, but do not take seriously or you will realise its unlimited flaws.
