Pretty weird. Over the top. You know who doesn't need to be in a Hardy Boys book? Satan.

Frank and Joe Hardy are out fishing with their friends at a holiday cottage when they notice an unusual commotion at a local camping site and decide to investigate. Meanwhile, their father, the famous detective Fenton Hardy is trying to find a missing scientist who might be working on a dangerous project to create super athletes. The two boys travel the Canadian railways in attempt to get to the bottom of both cases!

I have clearly outgrown this youth detective series that I have enjoyed so thoroughly as a child. The writer clearly underestimates the size of Canada's provinces as the Hardys are zigzagging across them in record time.
